

Press Release

Questions will be answered by Erik Eliasson, +46 (0)705 55 63 86.

This release, or parts thereof, may be published immediately.
Please state TNS SIFO Prospera as the source.

Main results

Inflationary, GDP, wage increase and interest rate expectations for the year to come are all substantially above those in the September survey.

Vs the previous survey the money market players believe in a stronger SEK against EUR as well as USD.

TNS SIFO Prospera has been commissioned by Sveriges Riksbank (Central Bank of Sweden) to undertake a series of surveys aiming at mapping expectations of inflation, wage increase, GDP and future repo rates in Sweden among labour market parties, purchasing managers and money market players. The survey also includes money market players' expectations of the 5 year government bond rate, EUR and USD rates. The money market player survey is conducted every month; four times a year including labour market parties and purchasing managers. The latest survey in the all categories series, December 2010, has now been completed, the previous September 2010 was published September 8, 2010. The last survey among money market players was published November 10, 2010. A comparison of the results of the surveys can be summarised as follows (rounded off figures):

Interview Period & Method

TNS SIFO Prospera's inflation expectation surveys are carried out over the telephone. The part of the survey that encompasses inflation, GDP and wage increase expectations as well as all but money market players' expectations of repo rates, was carried out November 22 - December 7, 2010 (previous survey August 23 – September 6, 2010 (October 27- November 4, 2010)). The part of the survey regarding money market players' expectations of future repo rates, 5 year government bond rates, EUR and USD rates took place on November 24, 2010 (previous survey August 25, 2010, (October 27, 2010)).

About the Interviewees & Response Rate

In all 267 (267) organisations/companies were approached for interview. 17 (13) of the persons in the panel could not be reached or have denied participation, which means that there is an overall response rate of 94% (95 %). The response rate for individual questions regarding inflation, wage and GDP increase expectations is 92 % or more for the one year and two year assessments. For the five year assessment as well as the questions regarding repo rates, 5 year government bond rates, EUR and USD rates the response rate is generally lower. (Tables 2-8) Of the 158 purchasing managers 79 represent the trading industry and 79 the manufacturing industry. The group of companies interviewed is a random sample selected from a company directory at the National Statistics Office of Sweden comprising Swedish companies with more than 200 employees.

The money market category includes 54 players, 45 Swedish and 9 international, active in the Swedish fixed income market. The money market players were not asked to assess the expected wage increases. Only the money market players have participated in the part of the survey comprising expected 5 year government bond rates, EUR and USD rates.

55 Swedish labour market organisations, of which 26 on the employers' side and 29 on the employees' side have been approached.

Definitions

Inflation is defined as the percentage increase in Consumer Price Index (CPI). *Wage increase* is defined as the percentage increase in wages/salaries as measured over all sectors in the economy, exclusive of social costs but inclusive of wage increases negotiated earlier and wage drift. The *repo rate* is the Riksbank's borrowing/lending rate from/to banks for seven days' money and the *GDP*, Gross Domestic Product, is defined as the value of all goods and services produced (by Swedish agents) in one year.
